

The Departments of Surgery & O&G conducted the 1st Workshop and Hands on Training Programme on Minimal Access Surgical Techniques (M.A.S.T.). It was a good academic feast for the residents who registered. Twelve patients were demonstrated in the workshop including cholecystectomy, laparoscopic hernioplasty, fundoplication, hysterectomy, ovarian cystectomy. For the first time at AIIMS Bhubaneswar, there was a live transmission of the surgeries to the classroom for the MBBS students, who were greatly benefited by seeing the surgeries and interacting with the faculty members.
